

Pre Amplifiers

The Exposure 21 pre-amplifiers are the first in our range to incorporate in-built power supplies. This has been accomplished without any degradation to performance, and follows on from the extensive research and development carried out for our highly acclaimed integrated amplifiers. The mains transformer plays a vital part in determining the final sound quality and because of this we have designed our own, incorporating many unique construction techniques. The result is a major step forward in sonic performance.

model shown: RC21

Features

21

- ❖ 250VA Power Supply
- ❖ Gold Plated Phono Sockets
- ❖ Toroidal Transformer
- ❖ XLR Unbalanced Main Output
- ❖ Alps Volume Potentiometer
- ❖ Aluminium Case and Front Panel
- ❖ 6 Line Inputs, 1 Tape Output
- ❖ Remote Control Operation

Specifications

21

Frequency Response	20Hz-20kHz +/- 0.5dB
Input sensitivity/impedance	Line 150mV, 20kΩ
Power Supply	250VA
Inputs	6 x Line
Outputs	2 x Tape (600Ω) 2 x Main (3Ω, 15V max)
Dimensions	440 x 90 x 345 (mm)
Weight	9.0kg boxed
